NASA Triad: Workshop Troubleshooting

Despite meticulous planning, workshops don't always run as smoothly as we'd like. In the attached document, we describe situations that have all occurred in past workshops. Take some time, read these over, and reflect on how you would handle similar situations in workshops you might lead. Feel free to share your thoughts on these situations with us via the secure wiki. If you are not currently registered for the Triad wiki, please send an email to Laura Middaugh Rios at [llm \[at\] agiweb \[dot\] org](mailto:llm@agiweb.org). Thanks!
