

Member Society Codes of Ethics

Click here to read the **American Geosciences Institute's Guidelines for Ethical Professional Conduct**.

Member Society Codes of Ethics:

- **AAPG:**
Members must uphold a responsibility to the public, employers, clients, other members and the association based on objective geologic science and professionalism.
- **AAG:**
AAG members should adhere to professionalism in all relations, while at the utmost strive to encourage the well being of all as a result of their endeavours.
- **AEG:**
AEG's values include upholding sound principles of scientific inquiry, facilitating education, and building public appreciation for how environmental/engineering geology can contribute to public safety and the protection of property.
- **AIH:**
Members should hold in the highest regard public trust and reputation of profession.
- **AIPG:**
Members should pursue integrity as a way of life. Communications with the public should be accurate, and obligations to clients or employers that conflict with professional ethics should have such objectionable conditions corrected or resign.
- **AGU:**
Members have key responsibilities, including maintaining scientific integrity by bolstering the advancement of science, adhering to AGU policy's on peer review and professional ethics.
- **ASBOG:**
ASBOG aims to provide guidance to its members on issues of professional ethics.
- **GSA:**
GSA aims to further understanding of geosciences through honest forum, ensure accessibility of accurate information, and encourage effective education in all geosciences disciplines.
- **GSL:**
All GSL members shall adhere to publishing ethics, professional behaviour and relationships in consideration of the public good and other constituent professional codes with regard to the study and advancement of geologic knowledge.
- **SEG:**
SEG members should cooperate in the exchange of information so as to advance the geophysical profession, while contributing to the integrity of science, enterprise and the public.
- **SIPES:**
SIPES members shall abide by ethical guidelines when informing the public, maintaining a client/employer relationship, and in exchange with other earth scientists.
- **SME:**
SME members must maintain firstly the responsibility for the welfare, health and safety of community. They shall also maintain integrity in their profession.
- **SVP:**
SVP members must strive to advance the science of vertebrate paleontology, serve the common interests of all those associated with vertebrate paleontology as it relates to earth science, support discovery and preservation of specimens and knowledge, and to foster education and appreciation of the public within the realm of paleontological science.
