

What is geoscience?

geo•sci•ence

The sciences exploring solid earth, water,
oceans, atmosphere, and space.

Weather Forecasting

Earthquake Monitoring

Soil Conservation

Energy-Water Interactions

Carbon Capture and Storage

Floodplain Mapping

Volcanic Eruption Forecasting

Coastal Construction

Natural Resource Development

Agriculture Productivity

Groundwater, Lakes and Stream Monitoring

Glacial Movements and Impacts

Waste Management

Critical Minerals

Drought Mitigation

Oil and Gas Exploration

Ocean Phenomena

Space Weather

Fossils

...and much more!
