AGI Examines Geoscience Students' Society Membership Choices

Alexandria, VA – The American Geosciences Institute has released a new Geoscience Currents that examines the choices by geoscience students when provided up to five free memberships in geoscience societies. Data from 2009-2011 is presented showing trends in student preferences and/or influences from advisors. AGI's Geoscience Currents provide snapshots of helpful data regarding current trends and the status of the geoscience discipline.

A copy of Geoscience Currents #54 can be downloaded at
<http://www.agiweb.org/workforce/Currents/Currents-054-GeoConnectionRecruitmentPackets.pdf>.

Interested in participating in AGI's Geoscience Currents? Check out our website at
<http://www.agiweb.org/workforce/currents.html>, and register to receive free email delivery of Geoscience Currents.

The American Geosciences Institute is a nonprofit federation of 50 geoscientific and professional associations that represents more than 250,000 geologists, geophysicists and other earth scientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interests in the profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in society's use of resources, resiliency to natural hazards, and interaction with the environment.
