

# Soil Science Workshop for Educators

North Central Regional Soil Survey Conference  
University of Wisconsin in Platteville, Wisconsin  
**June 24-27, 2024**  
Open to middle and high school science teachers

Join the **American Geosciences Institute** and the **Natural Resources Conservation Service** for an immersive workshop designed to deepen your understanding of soil science and its integration into standards-based curricula. Led by experienced educators and soil science experts, this comprehensive workshop offers a dynamic exploration of soil science, innovative teaching strategies, and hands-on field experiences. The workshop will be run in conjunction with the North Central Regional Soil Survey Conference. Participants will have the chance to attend presentations and interact with soil scientists and other educators during the conference, **including during a day-long field excursion.**

Whether you're a seasoned science teacher or new to soil science education, this three-day workshop offers valuable resources, professional development opportunities, and networking connections to support your journey as you incorporate soils into your teaching.

Apply now at <http://bit.ly/SSW-app>

Review of applications will begin **April 26** and will continue until the workshop is filled. Participants will be provided with conference registration, room, and board for the duration of the workshop and will be reimbursed up to \$800 for travel expenses.
