## Geoscience Currents 59 Quantifies Students' Attitudes toward Pursuing Geoscience

Alexandria, VA – In continuation of the Geoscience Academic Provenance research series conducted by Houlton (Geoscience Currents 45-48, and 57-58), Geoscience Currents 59 presents quantitative data collected from participants through a Likert-based survey. Participants were asked to rate their feelings toward geoscience on a scale from 1 to 7. The aggregated responses illuminated the changes over time in the students' attitudes toward pursuing geoscience.

A copy of Geoscience Currents 59 can be found online and downloaded from  
<http://www.agiweb.org/workforce/currents.html>.

Geoscience Currents are quick snapshots of data released by AGI on the status of the geoscience workforce. The Currents also represent data collaborations with other societies, employers, and professionals. Topics for these reports are inspired by inquiries from geoscience community leaders. Interested in participating in AGI's Geoscience Currents? Visit <http://www.agiweb.org/workforce/currents.html>, and register to receive free email updates containing all the new Geoscience Currents.

###

The American Geosciences Institute is a nonprofit federation of geoscientific and professional associations that represents more than 250,000 geologists, geophysicists and other earth scientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interests in the profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in society's use of resources, resiliency to natural hazards, and interaction with the environment
