AGI Announces Release of the Directory of Geoscience Departments, 47th Edition in Print and as an e-Book

ALEXANDRIA — The American Geosciences Institute (AGI) is pleased to announce that the new edition of its cornerstone reference, The Directory of Geoscience Departments, has just been published. The new 47th edition is currently available as an e-book for the Kindle, iBookstore, and Nook, and will be available in print directly from our website (<http://www.agiweb.org/pubs/pubdetail.html?item=800801>) or through amazon.com starting April 2, 2012.

The 47th edition of the Directory of Geoscience Departments is the most comprehensive directory of geoscience departments and researchers available. It is an invaluable resource for individuals working in the geosciences, or who must identify experts with specialties in various geoscience fields.

The 47th edition of the Directory of Geoscience Departments provides state and country-sorted listings of over 2,300 geoscience departments, research departments, institutes, and their faculty and staff worldwide. Contact information for departments and individuals is provided, as well as details on department enrollments, faculty specialties, and the date and source of faculty and staff's highest degree.

This new edition greatly expands the coverage of departments and organizations outside of North America, as well as comprehensive coverage of 2-year institutions in North America which have a geoscience presence on their campus.

The printed version of the book will be available for \$35.00 (\$28.00 for AGI Member Society Members) plus shipping starting April 2, 2012.

The e-book version is available for \$9.99 worldwide for the Kindle, Nook, and on the iBookstore for iPads and iPhones. Please visit these sites to purchase your copy today!

###

The American Geosciences Institute is a nonprofit federation of 50 geoscientific and professional associations that represents more than 250,000 geologists, geophysicists and other earth scientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interests in the profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in society's use of resources, resiliency to natural hazards, and interaction with the environment.
