EARTH Available for Digital Download

Alexandria, VA –EARTH Magazine is now available for single issue downloads as a PDF. With growing demand for online access to full content, EARTH Magazine is pleased to offer this new service. Individual issues of EARTH can be downloaded from the EARTH Magazine website (http://www.earthmagazine.org) for $4.99 per recent issue, and $2.99 for issues published more than 6 months prior to the current issue.

Downloading digital issues of EARTH is a great way to catch up on earth science news—and requires no subscription. Another advantage to the digital magazine: the PDF issues will be available at least 2 weeks prior to publication date - so when you can't wait for EARTH, you can download it instantly.

And as always, a full year print subscription is available through the American Geological Institute at a substantial discount from the newsstand price.

To browse EARTH's digital issues, go to http://www.earthmagazine.org and click on “Downloadable Issues,” or point your browser to: https://www.agiweb.org/store/earth/backissues/.

Keep up to date with the latest happenings in earth, energy and environment news with EARTH Magazine, available on local newsstands or online at http://www.earthmagazine.org/. Published by the American Geological Institute, EARTH is your source for the science behind the headlines.
