AGI Re-launches Geoscience Community Newsletter

Alexandria, VA – The American Geological Institute (AGI) is pleased to announce that it has re-launched its geoscience profession newsletter, *GeoSpectrum*.

GeoSpectrum has long been a source of news and information highlighting AGI's programs. Now, *GeoSpectrum* is an outlet for all of AGI's 47 Member Societies and other geoscience organizations to share information with each other and the broader earth science community. The new *GeoSpectrum* is a quarterly electronic magazine available as a printable PDF through the AGI website. This one central news source includes current geoscience society news, award announcements, scholarship postings, articles covering earth science education, classified ads and calendar postings, plus much more.

The new *GeoSpectrum* is available as a free PDF that can be downloaded by visiting <http://www.agiweb.org/geospectrum/>. Visitors can also sign up to receive notification emails when the latest issues of *GeoSpectrum* become available.

To remain up-to-date on the latest news, the *GeoSpectrum* blog features short notices on upcoming events, calls for nominations, and other time sensitive postings. Visit <http://www.agiweb.org/geospectrum-blog/> to see the most current news.

The American Geological Institute is a nonprofit federation of 47 geoscientific and professional associations that represents more than 120,000 geologists, geophysicists and other earth scientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interests in the profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in society's use of resources, resiliency to natural hazards, and interaction with the environment.
