Geotimes Online: Now with Video

Alexandria, VA – The American Geological Institute (AGI) is pleased to announce the first *Geotimes* videocast, available both through <http://www.geotimes.org> and YouTube. The premiere videocast takes a look at the current developments related to the Chaitén eruption in Chile.

Geotimes Online is now producing original videocasts of Earth-related news. The videocasts will cover current geologic news, including natural disasters, current research and public policy affecting the geosciences. Anchored by staff writers of the magazine, the videocasts supplement *Geotimes*' regular earth science news items throughout the month.

To view the latest posting as well as to read features from the magazine and view other Web Extras, please visit <http://www.geotimes.org/>.

Keep up to date with the latest happenings in earth, energy and environment news by checking out *Geotimes* online at <http://www.geotimes.org>. Published by the American Geological Institute, *Geotimes* is your source for news and perspectives on research, technology and policy that affect you every day. Sign up for E-alerts, our short, weekly e-mails that alert subscribers to new content posted on the *Geotimes* Web site, and subscribe to the magazine at <http://www.geotimes.org>.

The American Geological Institute is a nonprofit federation of 44 geoscientific and professional associations that represents more than 120,000 geologists, geophysicists and other earth scientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interests in the profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in society's use of resources, resiliency to natural hazards, and interaction with the environment.
