AGI Adopts New Format for GeoSpectrum

Alexandria, VA – The American Geological Institute (AGI) has updated its e-publication, GeoSpectrum, to better serve the 120,000 members of its Member Societies. Now in an easy-to-read online format, GeoSpectrum continues to cover the latest happenings within the geoscience profession.

GeoSpectrum, originally AGI's print newsletter, was reintroduced to the geoscience community in 2005 as a quarterly PDF electronic publication. It is now updated continually to provide readers with a responsive source for news about their profession.

To access GeoSpectrum, go to <http://www.agiweb.org/geospectrum/>. GeoSpectrum is always looking for news and articles about the profession. Please contact Andrea Martin, GeoSpectrum Editor, at asm@agiweb.org to contribute.

The American Geological Institute is a nonprofit federation of 44 scientific and professional associations that represents more than 120,000 geologists, geophysicists, and other earth scientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interest in the profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in society's use of the resources and interaction with the environment. More information about AGI can be found at <http://www.agiweb.org/>. The Institute also provides a public outreach site at <http://www.earthscienceworld.org/>.
