

Geosciences Supporting a Thriving Society in a Changing World

American Geosciences Institute

AGI and its federation societies identify nine areas where the geoscience community's knowledge, experience, and ingenuity can address society's most pressing issues.

AGI's 2020 Critical Needs Document identifies issues and policy recommendations for the next administration, federal agencies, and lawmakers to address with geoscientists.

Geoscience helps us thrive by:

Mitigating and Adapting to Climate Change

Ensuring Access to Clean Water

Developing Energy to Power the Nation

Building Resiliency to Natural Hazards

Promoting Healthy and Productive Soils

Providing Minerals for Modern Society

Securing Thriving Oceans and Coastal Areas

Managing Waste for a Healthy Environment

Developing a Diverse and Robust Workforce
