

Employment Projections for Geoscience-related Occupations (2008-2018)

Employment in geoscience-related occupations is expected to grow about 23 percent between 2008 and 2018, which is much faster than the average growth of all U.S. occupations (10%). Environmental engineers are expected to see the largest growth in number of new jobs with a 31 percent growth rate, while geoscience engineering managers are expected to see the smallest growth at 10 percent.

Employment growth for aggregated geoscience-related occupations will be most robust in the professional, scientific, and technical services sector (50%) and the waste management sector (32%).

Note that these projections do not factor in replacement needs due to attrition.

Geoscience Currents Discussion Webinar:

*Salary Trends and
Employment Projections for
Geoscience Careers*

October 3, 2011, 1-1:30 pm US EDT

Listen to an in-depth discussion of
Currents #49-53.

Participation in the webinar is free.
